EXECUTIVE SUMMARY

A Computer Science Graduate from MIT ADT University, Front-End React Developer and with 8 months of experience in React, Redux, Typescript JavaScript, Node Js, HTML, CSS, and related technologies. Experience building a complex healthcare application for One of Top Research College in London

FUNCTIONAL EXPERTISE

- **Programming in JavaScript, React, Python**
- **Software and Engineering Documentation**
- **Technical Troubleshooting and Debugging**
- **Teamwork and Cross-functional Communication**
- **Jira and Confluence**
- **Problem Solving Skills**

FUNCTIONAL EXPERTISE DEMONSTRATED

AVEGEN   **01/09/2022 – 02/2/2023**

Avegen is a product based digital healthcare solutions company with 200+ employees and are live in 14 countries with clients all around the world.

Engineering Intern
Contributed on react web-application and react native apps.
[Built a complex healthcare application for One of Top Research College in London.]

- **Integrating Google Analytics** and firing custom google events to track and collect the meaningful data for Data Analysist to Extract Insights. (React Web-App)

- **Developing Reusable Components** that can be used where needed increasing the scalability and reducing the time taken.

- **Experience working with Git** for version control and collaborating with other developers using tools like Jira and Confluence

- **Creating interactive UI** CSS to implement the desired interface and added functionality to it as per the client's requirements.

- **Creating Json Configurations** on Back-end Application. Creating custom Email Templates and Email Templates configurations, Creating Forms and Form Configurations, Notifications and alerts Configurations.

- **Bug Fixing and changing work Flow** that came according the various stages of projects and maintaining the integrity with proper PR's on Atlassian.

- **Updating and Managing CMS** (Content Management System) Adding new content on CMS, updating old Content, creating related Configs to support the CMS.

RELEVANT PROJECTS

My experience with React includes building multiple projects during my coursework, where I gained proficiency in creating interactive user interfaces, state management, and using React libraries and frameworks such as Redux and Next.js. Additionally, I have experience working with HTML, CSS, JavaScript, and Git. I also have experience using APIs and integrating them into web applications.

Researcher papers published during college:
Deepfake Detection: (Published on IJRASET: IJRASET44110)
Face Mask Detection and Social Distancing Monitoring: (Published on IJRASET: IJRASET32823)

EDUCATION

Bachelor of Technology (Computer Science): MIT ADT UNIVERSITY (Loni Kalbhor, Pune)
